1. Getting Started with Tournament Indicator

1.1 Installation

You can install Tournament Indicator from <u>http://tournamentindicator.com/download.php</u>. You need to have "Administrator" privileges with your computer account. The installation is free. Tournament Indicator supports Windows OS only. We'll develop a Mac version in future.

1.2 Free Trial

You can try Tournament Indicator with real money tournament games for 7 days. No license code is needed for the free trial.

Tournament Indicator supports Limit and NL/PL Texas Hold'em games, including Multi-table Tournaments and Sit N Go's.

1.3 Run Tournament Indicator

Tournament Indicator is very easy to use. You can launch Tournament Indicator before or after you sit in at a table. Tournament Indicator will automatically find and attach itself to the game table that you're playing at.

To make sure Tournament Indicator catches your first hand, please launch it before your game starts.

Tournament Indicator supports multiple game tables at the same time. You can multiple instances of Tournament Indicator by double clicking the icon of Tournament Indicator multiple times. Each of the Tournament Indicators will work with each of the game tables independently. Also, you can click "Tools" > "Settings" on your Tournament Indicator. Select the option "Find new game tables automatically". After that, your Tournament Indicator will open a new instance automatically if there's a new game table available. You can make your Tournament Indicator start/stop finding new game tables by "Right Clicking" on the Tournament Indicator icon in your system tray.

Stop Finding Close All Indicators	
Exit	K.
EN 🛛 🕻	<u>.</u>

1.4 Software Upgrade

You'll get free upgrades for new versions of Tournament Indicator. Tournament Indicator will automatically detect the availability of a newer version and popup a notification message. Also, you can re-download and install Tournament Indicator to get the latest version. You don't need to re-enter the license code after reinstallation if you already unlocked it.

1.5 License Code

You can <u>Get a License Code</u> for Tournament Indicator. Tournament Indicator license is a life-time license. You don't need to renew it every year. You'll get free upgrades for new versions and get 24/7 customer support from us.

To generate a license code for you, you need to send us your Product ID. Click the "Enter License" button on the top right corner of your Tournament Indicator. You'll see a Product ID on the low right corner of the window. See the screenshot below.

The "Enter License" button will be covered by the MZone meter if you're playing with Tournament Indicator. You can launch another standalone Tournament Indicator to see the "Enter License" button.

2. Settings Required for Your Poker Sites

2.1 Poker Sites Supported

Tournament Indicator supports more than 300 poker sites. The French sites (PokerStars.fr, FullTilt.fr, PartyPoker.fr, etc), Italian sites (PokerStars.it, etc), Sweden site Svenska Spels Poker are supported as well. For the list of all the sites supported, visit <u>http://tournamentindicator.com/supportedrooms.php</u>. We're continuing to add new sites.

On some of the poker sites, you need to re-install or change it to English if you use another language in your poker client.

2.2 PokerStars

You need to change it to English if you use any other language in your poker client.

Change the PokerStars game table chat option to "Dealer Everything" as shown on <u>http://www.holdemindicator.com/help/ps.php</u>. See the picture below.

Enable the instant hand history as shown on <u>http://www.holdemindicator.com/help/pshand.php</u>. Put the hand history path under your PokerStars installation folder or any other folder where you have "Write" rights. Also, make sure you use English for the language setting of your hand history files.

2.10 Other Poker Sites

No particular setting requirement for the following sites:

PartyPoker; Unibet Poker; Ongame Network; Winamax; PKR (English only); Winning Poker Network(Americas Cardroom); Boss Media(IPN) sites; Revolution Gaming(Cake) Network Fulpot Poker (English only); Chico (Betonline), Europe-bet, Pokerdom; GG Poker Network (AllNewPoker);

3. Main Screen

3.1 Overview

Tournament Indicator can be used as "Horizontal View" (by default), "Vertical View" and "Mini View". Click the "Views" menu on your Tournament Indicator. With the Horizontal View, you can resize it by dragging the low right corner of your Tournament Indicator.

You can choose the option "Enable HUD and Hide Main Window". So Tournament Indicator will display everything on the game table. It's very convenient for multi-tabling.

On the left border of Tournament Indicator, you can choose to display "Hand Odds" or "Player Stats". You can switch player stats between "Current Session" and "History Stats" by clicking the "h" button. You can also display the player stats in a separate window by clicking the "+" button.

On the top left of the title bar, there're a bunch menus for different functionalities. You can check them out. is the "Always on Top" button. replay hands you have played.

3.2 Win Odds

Tournament Indicator win odds are calculated with a sophisticated mathematical algorithm based on your pocket cards, the community cards, and the number of players in the hand. Tournament Indicator offers accurate win poker odds that you can trust. If you use percentage format to display the win odds, the higher value win odds displays, the better hand you have. You can change the display format to **"Ratio"** in the settings window after you click **"Tools"** > **"Settings**".

3.3 Pot Odds

Pot odds is simply a ratio of the amount of money in the pot compared with how much money it takes to call. The higher the ratio, the better your pot odds are. If there are \$12 in the pot and it costs \$4 to call then you are getting 3:1 odds ("cost to stay in"). This can be translated to a percentage, representing the size of your contribution in the new pot. It will be 25% in the above example. If you use percentage format to display the pot odds, the lower value pot odds displays, the better pot you have. You can change the display format in the settings window after you click "**Tools**" > "**Settings**".

3.4 Hand Odds

Tournament Indicator displays the probabilities of hitting a particular hand at showdown for you **AND** your opponents at showdown. For example, if it shows 20 on flush for you and 30 for your opponents, it means that you have a 20% probability of getting your flush, while your opponents collectively have a 30% chance of hitting a flush.

3.5 EV (Expected Value)

Expected Value for your hole cards. Expected value is the average amount of big bets this hand will make or lose. These statistics were compiled by a major online poker room from their database of millions of real live hands. So, for example, AA from the small blind in a 3/6 game will make on average 2.71 times the big blind, or \$16.20 per hand (2.71 * \$6). 22 from the button however, will make -0.12 EV, or -\$0.72 in a 3/6 game (6 * -0.12). By only playing poker hands that have profitable EV, you will certainly improve your Texas Hold'em game. Please remember however, that this is a compilation of EV for the average player, so they are just representative of long term statistics and not Texas Hold'em facts. You will still need to play your poker hands accordingly, which means you need to observe your opponents, and play as the flop sees fit.

Here are the Expected Value hand charts for <u>2 Players</u>, <u>6 Players</u>, <u>10 Players</u>.

3.6 Sklansky Group/Rank

This is another way to describe your hole cards' strength. In the book of Hold'em Poker for Advanced Players by David Sklansky, he divides the starting hands into 9 groups. Group 1 is the strongest; group 9 is the weakest. Here is the whole list for the Sklansky Groups.

This is a strategy book for limit Hold'em, but the starting hand groups do have some practical use in no limit Hold'em.

For PokerStars and Full Tilt (only), we use "Rank" to indicate the absolute strength of your starting hand, 1-169, 1 is the best hand. Holdem Indicator converts into percentage as "top %". You can get more information about the starting Hand Ranks

Holdem Indicator provides EV, Sklansky Group/Rank and Win Odds for your starting hands. They're all independent numbers. You can choose the one you prefer to play your own starting hands.

3.7 Outs

OUTs refer to the unseen cards still left in the deck that will improve your hand after the flop. As you might guess, the more cards left in the deck that will improve your hand, the better. That's why, after the flop, you want to stay with hands that can be improved in a number of ways. The more outs, or ways your hand can potentially improve on the Turn or the River, the better your chances are of winning the pot. By counting your outs, you can do a very rough, quick calculation to estimate your chance of improving your hand after the flop, and hopefully having a winning hand. Knowing how likely (or unlikely) you are to improve will help you make a better decision about how much (or little) to invest in the hand. Tournament Indicator shows you the total outs and what the outs are. Tournament Indicator displays the OUTs from **the strongest to the weakest**. So you can easily ignore the weak ones if you wish.

Keep in mind that Holdem Indicator doesn't calculate Win Odds based on OUTs. They're independent. You can use either of them to judge your hand strength.

3.8 Position

Tournament Indicator shows your position after flop. For a full size table (7-10 players), the first three seats after the button would be Early. The button and the two seats before it would be Late, and in between is the Middle. For short-handed tables (5-6 players), Early and Late position are the first and last two positions. For tables with 2-4 players, Early and Late position are the first and last position.

3.9 Mucked Hands Display

The "Mucked Hands" feature is available for Party Poker, EmpirePoker, Full Tilt, PokerStars, iPoker network, Cake Poker Network, 888(Pacific) Poker, Merge Network.

Tournament Indicator reads the mucked hands information from the hand history files. If there are some mucked cards in a game, the poker client will write this information to the hand history file. Then Tournament Indicator will read and display them. Keep in mind that not every hand has the mucked cards.

For the "Mucked Hands" feature to work well, you need to enable the instant/local hand history option in your poker client and put the language to English.

3.10 NUTS Hand Alert

Eliminates any confusion when you have the best possible hand. This way you can focus on how to win the most money from your helpless opponents.

3.11 Manual Calculator

Click "Tools" > "Manual Calculator" or Double Click on the cards display area, you can launch the Manual Calculator. During play, you even can replace one card to another by double clicking it.

3.12 Match Cards

Tournament Indicator has a "Match Cards" feature which is used to assess situations late in a tournament where you might go all-in. To get more understanding about the match cards feature, you can watch a video on http://www.tournamentindicator.com/matchcardsvideo.php

4. Player Stats

4.1 Overview

Tournament Indicator stores Player Stats automatically on your computer. The stats will be loaded automatically next time you're sitting with a tracked player (if you choose to display history stats option). This data is collected using the same information you receive while sitting at the poker table. Tournament Indicator does this by reading the log files supplied by the online poker rooms themselves. The major difference is that Tournament Indicator actually remembers the action and automatically recalls it for you. Top professionals have amazing card memory - so can you!

In your Tournament Indicator installation folder, you can see a sub-folder named "Statistics", where the stats database file is located.

9		C	History	Data						

You can change the stats display format in the settings window after you click "Tools" > "Settings".

4.2 MZone & Stats Definitions

MZone: The "M" score is a ratio of your stack to the blinds and antes and dramatically affects your starting hand selection and strategy. Tournament Indicator calculates everyone's MZone score at your table, giving you a huge advantage when it comes to exploiting those opponents' mistakes. To get more understanding about the MZone feature, you can watch a video on http://tournamentindicator.com/mzonebasicsvideo.php

MZone = (Table Stacks)	/ ((BB + SB) + (Ante *	* Number of players))
------------------------	------------------------	-----------------------

20+ 20-10 1(-6 5-1 1-0		20+	20 - 10	1(- 6	5 - 1	1 - 0
------------------------	--	-----	---------	--------	-------	-------

Level	Zone	Recommended Play
1	Groop Zopo	When your M is above 20 , you have many poker tournament strategy options
1	Green zone	available. Here you can raise, re-raise and still have chips left if you lose a hand.
		Here your M is between 10 and 20 . Loosen up now to stop the blinds eating away at
2	Yellow Zone	your stack. Small pairs and suited connectors are less desirable now as your implied
		odds (chance of winning a big pot from a small investment) are lower.
2	Orange Zone	Your M is now between 6 and 10 . Here you have lost the ability to "resteal" and your
5		stack is dwindling, you must now play aggressively to stay alive in the tournament.
4	Pod Zopo	M is 5 or less. Here you have lost all flexibility if you play a hand it should be all-in, try
4	Red Zone	to be first into a pot to maximize the chance opponents will fold.
5	Deed Zerre	M of less than 1. Here you are on the tournament critical list – any high cards are
5	Deau Zone	good enough for an all-in move, but expect to be called!

VPIP: Voluntary Put Money in Pot. Percentage of games a player voluntarily puts Money in the pot preflop. Blinds do not count unless a player completes the small blind or calls a raise or raises from either blind. It measures a player's tightness/looseness, which helps indicate the range of hands that the player will see a flop with. **Green** for Tight, **Black** for Neutral, **Red** for Loose. Below are the default settings.

VP\$IP	Category
VP\$IP < 24%	Tight
24% < VP\$IP < 30%	Neutral
VP\$IP > 30%	Loose

PFR: Pre-flop raise percentage.

3Bet/F: 3Bet pre-flop. % of times a player raises pre-flop when facing a raise. It includes 3 Bet, 4Bet, 5Bet, etc.

/F: % of times a player folds when facing a 3Bet. It applies to the 1st raiser only. In case that hand is a 4bet hand eventually and the 1st raiser folds, it's not a "Folded to 3Bet pre-flop"

Steal/F: % of time a player raises unopened pot pre-flop from the CO (Cutoff), Button and SB position. A steal can only be made if everyone in front of the stealer folds so that the stealer is making the first bet pre flop and only from the cutoff, button or small blind. If there is a limper in front and the steal position player raises, that is classed as "raising limpers" and not "stealing".

/F: % of times SB/BB folds when facing a steal.

AF (Aggression Factor): It measures a player's aggression/passivity, which represents the player's betting tendencies *after* the flop. Tournament Indicator provides a combined AF for flop, turn, and river. If a player makes some raises and bets but never calls, the AF will be displayed as **Inf**, which means "infinite".

AF = (Raise% + Bet %) / Call %

Red for Passive, Black for Neutral, Green for Aggressive. Below are the default settings.

AF Value	Category			
AF < 1	Passive			
1 < AF < 1.5	Neutral			
1.5 < AF	Aggressive			

CBet/F: Continuation bet on flop. % of time a player bets the flop after being the pre-flop raiser. A CBet can only be made when there are players to act before the pre-flop raiser, if those other players all check to the pre-flop raiser.

/F: % of time a player folds to a continuation bet on flop.

WSD/W: To further categorize players, we use "Went to Showdown %" to measure whether a player is Solid or Overplay. It is based on the hands when saw flop. Green for Solid, Red for Overplay. Below are the default settings.

/W: Went to Showdown and Won percentage.

WSD%	Category		
WSD < 39%	Solid		
39% < WSD	Overplay		

Net: The chips amount a player Won/Lost in last 10 (by default) hands. It is very interesting to observe how different playing styles (see VPIP, AF, etc) correlate with winning or losing patterns. Also, the balance may represent additional useful information regarding the player's current mindset (who is more likely to "play it safe", who is getting desperate, who is about to "go on tilt" etc).

(Hand) Streak: The number of hands a player has Won or Lost in a row. The total number of hands tracked is also displayed in this column. For example, "+2/5" means the total number of hands is 5, and that player won 2 hands in row.

4.3 Profiling Icons (This feature is unavailable for PokerStars and Full Tilt)

Tournament Indicator may assign a profiling icon to a player when it collects more than 40 (by default) hands of data for that player. Below is the list of all the profiling icons and the corresponding criteria. You can change the profiling thresholds in the low part of settings window after you click "**Tools**" > "**Settings**".

Rock (Tight, Passive).

🐔 Neutral, Neutral.

🙂 Neutral, Aggressive.

Reutral, Passive.

🐔 Loose, Neutral.

💭 Tight, Neutral.

Figure 20 hands, Tournament Indicator still can't profile this player as one of the icons above.

What sure yet. Not enough hands of data to categorize this player.

4.4 Player History Stats by MZones

Double click on a player's name to open the history stats window for that player. The stats data is categorized by MZones. You can also create a note for the player.

1	listory D	ata for p	opi (last 30 d	lays)	and the				省 – X
	MZone	VPIP	PFR	3Bet/F	Steal/F	AF	CBet/F	WSD/W	Won	Hands

8	N/A									0
	Summary	29	4			1.2		40(33	6	48
Pla	ayer Notes	c								
Blu	affer							-	Ref	resh
								_		
									CI	ose
Ľ								_		

Won%: Total winning hands percentage, which includes showdown won and non-showdown won.

Hands: Total number of hands the player played during that period.

4.5 Player Notes

In the player stats window, double click on a player's name, you can add/edit or view notes for that player. On the HUD overlay, click the profiling icon. Once a player has notes, there will be a "sign" on the player name or the profiling icon.

The notes data will be kept locally on your computer.

4.6 Player Stats Configuration

If you click the header of the "**Player**" column once or twice, you can sort players by the player name alphabetically or by the **seat positions** on the game table.

"Right Click" on the stats window, you can see some menu entries as below:

1	🛛 Tournament Indicator - Tournamen	t Strategy and Odds Calc	ulator		HUD	Views	Stats	Tools	-1	– ×
	Player MZone VPIP PFR 3Bet/F Stea	AF CB WSD/W Net Streak	EV:	Group:				1	10	20
	Reset Current Session Always Current Session for Me Gray Out Folded Players Select Stats to be Displayed		Outs:						i/A	50+
0	Ð		Win Odds	Pot Odds		FIN	DING	TABLE		3

"Reset Current Session". If you click it, the player stats will be reset to 0 for the current session.

"Always Current Session for Me". If you select this option, Tournament Indicator will always display your own stats for the current session even you select "History Data" option.

"Grey Out Folded Players". By default, the name of folded players will be grayed out. You can disable this option.

"Select Columns to be Displayed". You can choose which stats columns you prefer to display.

4.7 Player Stats Assistant

Click "Tools" > "Player Stats Assistant". You can use this tool to manage the stats database files, search the stats for a player offline, etc.

Backup: Backup your current stats information to a database file. So you can move the file to another computer or "**Restore**" the stats on the same computer after system reinstallation.

Merge: You can use the "**Merge**" function to merge stats from another computer: "**Backup**" the old stats from your old computer. Copy the database file to your new computer. Then you can "Merge" the old stats with the new one.

Restore: You can transfer/restore your stats information: "**Backup**" the current stats to a database file. Copy the file to a safe place. Then you can "**Restore**" it to the new installation.

Reset: Delete all the stats information you collected.

Query: Search the stats for your own or for a particular player on a poker site. The search results will be displayed with one record each month. You can select and delete the stats for a particular month. You can also update the "Notes" for that player.

5. Head-Up Display (HUD)

5.1 Overview

Tournament Indicator displays player stats, win/pot odds and mucked cards seamlessly on your game table. Tournament Indicator HUD is very easy to use. No complex configuration is needed.

This feature is currently not available for PKR, ClubWPT.

You can watch a video about this feature at http://www.youtube.com/watch?v=KYIAvoqw77k

5.2 HUD Functionalities on Table

Right Click on the HUD stats panel, it will popup a menu with a bunch of options as below.

***"Hide/Show Main Window": You can hide or show the main window of Tournament Indicator.

***"**HUD Options**": Launch the HUD options configuration window.

***"**Change the number of Seats**": You can change the number of seats for HUD dynamically. It's the number of seats on the table, not the number of players playing. On most of sites, you don't need to take care of this option as HUD will detect the number of seats by itself. This option is just for backup.

***"Put Me Here", "Move HUD clockwise", "Move HUD anti-clockwise": If you use the "Preferred Seat" option on some site, HUD sometimes can't detect the seat number for each player. In this case, you can use these menus to rotate your whole HUD position to the proper seat. You can use "Remember My Seat#" menu to remember your seat position. So you don't have to rotate it every time.

***"Edit Notes": Edit the notes for that player.

Move mouse over the player icon, it will display the description and notes (if any). Click the icon, you can edit notes for the player.

Move mouse HUD stats panel, it will display the detailed stats for the player.

g Ind M:29.3 B VP:36 PFR:9 W:331100 ST	:44) (AF:1.)	*111 ^K	tars, 🔤
Win: 27% Po	% 1		2: Loose, Neutral
	м	29.3	MZone
	в	44	Big Blinds
	#	11	Total Hands Tracked
	VP	36	Voluntary Put Money In Pot
	PFR	9	Pre-flop Raise
	AF	1.0	Aggression Factor
변경 문법을 가격할 수	W	33 100	(2:6 2:2)Went to Showdown, WSD and Won
	STL	0	(0:2)Steal, Fold to Steal
	3B	50 0	(1:2 0:1)3 Bet Preflop, Fold to 3Bet
otes Sti	CB		Continuation Bet, Fold to CB
	Ν	1200	Net
	STK	+1	Hands Won/Lost in a Row
25	Note	es:(Click F	Player Icon to Edit)

****For the "**STL**", "**3B**" and "**CB**" stats, HUD displays the stats in fraction mode as well in "()". In the above picture, we can see this player had 2 two chances to "steal", 2 is the total hands base. But he didn't "steal".

If you're using a different theme for your game table, the default HUD overlay might not be in the right positions. You can drag the stats to a proper location you prefer. The new positions will be remembered by HUD.

The 3 white characters match the first 3 characters of the player name. So you can tell whether the HUD positions are correct.

5.3 HUD Options

Click the "HUD" menu on your Tournament Indicator. Or right click on the HUD stats overlay, then "HUD Options".

R HUD

Enable Solid Background, Choose Color:
Enable Color Coding for Stats Text Default
Apply Cancel

***"**Enable HUD**", "**Enable HUD and Hide Main Window**": Enable the HUD overlay display on your game table. You can even hide the Tournament Indicator main window and use HUD only. On some poker sites, the HUD will be displayed after you finish one complete hand.

***"**Disable HUD**": You can disable the HUD overlay display dynamically.

***"**Select Stats to be Displayed**": To save the HUD space, you can choose which stats items to be displayed.

***"Hide Profiling Icons": HUD won't display the profiling icons for players if you choose this option.

***"Hide Win & Pot Odds Display": Don't show your Win & Pot Odds on HUD.

***"**Show Numbers without Symbols**": By default, HUD displays stats as something like "VP: 20 PFR: 8". You can choose to use "/" as a delimiter. So it will be displayed as "20/8". You can save some space by this way.

***"Stats Text Color", "Font": You can change the stats font name, size and color.

***"**Enable Solid Background, Choose Color**": By default, the HUD background is transparent. You can make it opaque with your preferred color.

***"**Enable Color Coding for Stats Text**": By default, HUD displays the stats text with different color when the value is more or less than a threshold. You can choose to disable this option.

6. Hand Replayer

Click or click "Tools" > "Hand Replayer". You can visualize hands you played with the exact Player Stats and Win Odds (for yourself and players with known cards).

- *****"Sessions" Menu:** Select a session to replay or delete an old session.
- ***"Options" Menu: You can change a bunch of options to customize your Hand Replayer.
- ***Double click on the seat of a player, you can view or edit notes for that player.

*****"Copy to Clipboard" Menu:** Copy the information for your current hand. So you can email it or paste it to a forum.

7. Stats Graphs

Click 🚮 or click "Stats" > "Stats Graphs". You can review your sessions with graphs.

*****"Sessions" Menu:** Select a session to review or delete an old session.

***"Options" Menu: You can change a bunch of options to customize your Graphs.

*****"Select Stats..." Menu:** You can select which stats to be displayed.

8. Tournament Indicator Settings

Click "Tools" > "Settings", or "Right Click" > "Settings" on your Tournament Indicator.

🖟 Settings

*****"Find new game tables automatically":** By checking this option, Tournament Indicator will launch new instances automatically for your new game tables.

*****"Select a game table to attach to on startup":** By checking this option, Tournament Indicator won't attach itself to any game table automatically. You need to manually select one of the game tables when you launch Tournament Indicator.

***"**Move with the game table automatically":** By selecting this option, Tournament Indicator will move itself with the game table automatically when you move your game table. For vertical and mini view mode however, this option is invalid.

*****"4 Color Deck":** Displays your hole cards and the board cards with a 4 color deck on Tournament Indicator.

*****"Keep Mini View Mode"**, **"Keep Vertical View Mode":** So you don't have to change the view every time you launch Tournament Indicator.

*****"Show my hole cards after fold":** By selecting this option, Tournament Indicator will keep displaying your hole cards after you fold your hand.

*****"Close Tournament Indicator when game table is closed":** So you don't have to manually close Tournament Indicator every time.

***"Work with Bovada/Bodog only": Holdem Indicator will find Bovada/Bodog game tables only.

***"Win/Pot Odds": You can change the Win/Pot Odds display format to Percentage or Ratio.

*****"Player Stats":** Display the player stats data in fraction mode. For example, display "1 : 2" instead of "50%", which is more accurate in some cases. Here "2" is the total hands base.

***"Player Profiling Options": You can change the player profiling thresholds.

*****"Min # of hands required to profile players":** You can set the minimum number of hands required to profile a player. By default, the number is 8. You can try to set a bigger number to get more reliable results.

*****"Last # of hands will be calculated for player stack change":** The chips amount a player Won/Lost in last # of hands. By default, the number is 10.

*****"Days history data will be displayed":** Tournament Indicator still keeps all your history player stats. This is for display purpose.
